

Platinum Eco 5000

Fully FSC Certified

**Not Just a Deck
– It's a Lifestyle –**

Whether it is being used in domestic, commercial or boardwalk applications, Eco 5000 is an engineered timber product to perform in Australia's harsh environment.

Supplied throughout the world
– whether it is in Australia,
Singapore, Malaysia, Japan,
Sweden or China
Eco 5000 still carries its
unsurpassed warranty.

**25 Year Termite, Borer, Structural
and Decay Warranty**

Eco 5000 is the ideal product for your external applications with its non-leaching and pre-finished properties for decking, screening, landings, walkways, jetty's or boardwalks. Every piece is 5 metres long, straight and easy to work.

No sorting of short lengths, less installation time and less waste means less cost and more savings.

Testimonial:

Having sold numerous packs of Eco 5000 Decking to an ever increasing market I can report we have had nothing but glowing praise about this product.

From our experience, once our customers have used Eco 5000 Decking it is preferred over conventional random length solid timber alternatives.

I believe being all 5.0 metre long lengths, its ease of installation, being pre-finished with a 25 year structural, decay and termite warranty, enhances the overall experience of Eco 5000 a modern day alternative.
